FULL LINE PRODUCT CATALOG

ENGINE OIL ADDITIVES

Oil additives help reduce friction and wear, prolonging the lifespan of engine components and promoting smoother operation. Lucas additives can improve fuel economy, enhance engine cleanliness by preventing deposits, and provide better protection against oxidation and corrosion, improving overall vehicle performance and efficiency. With specialized blends for applications like engine break-in, high mileage, heavy-duty, or imports, find the best additive for your needs.

PROBLEM SOLVERS & UTILITY

These problem-solving products are made to tackle your toughest automotive or equipment issues. Whether you're dealing with a leak, squawky transmission, fuel system complications, power steering problems, sticky shifting, reduced fuel efficiency, flat tire or more, Lucas products are trusted by millions of drivers to get back on the road with confidence. If your vehicle has a problem, try Lucas first.

BAG IN A BOX

Lucas Oil's "Bag in a Box" oil program is specifically designed to be used by dealerships, auto repair shops, and quick lubes for their ability to carry multiple oil grades and specialty items for faster lube servicing and dispensing. The packaging is 100% recyclable with an eco-friendly design that reduces waste by using less plastic and utilizing every drop from the oil. Lucas Oil's most common motor oils are available in "Bag in a Box".

IMPROVE FUEL ECONOMY • ENHANCE ENGINE CLEANLINESS • I

IMPROVING OVERALL VEHICLE PERFORMANCE AND EFFICIENCY

HEAVY DUTY OIL STABILIZER

Lucas Heavy Duty Oil Stabilizer is the #1 heavy duty and high performance oil supplement in the world. It eliminates dry starts and resists thermal breakdown for total protection in new engines. It stops smoking, knocking and oil consumption in worn engines. It raises oil pressure, adds lubricity, lowers oil temperatures and stops leaks. It also extends oil life by at least 50%. Use it in any manual transmission or differential to stop wear, leaks, heat, noise and hard shifting. This product safely blends with all petroleum products, even synthetics. It will not void new car warranties.

PRODUCT NUMBER	PER CASE	U.S. MEASURE	U.S. WEIGHT	QTY. PER PALLET	LARGER SIZES

10002	4X1	1 Gallon	33 lbs	60 Cases	55 GAL DRUM 10091

PURE SYNTHETIC OIL STABILIZER

Lucas Pure Synthetic Oil Stabilizer is perfect for use in new equipment that requires synthetic oils or any equipment that needs enhanced performance. It's the perfect addition to race cars, new cars and four-cylinder cars. Controls heat and wear in motorcycles, air-cooled engines and all drive-train components. This product greatly reduces friction, improving vehicle performance and fuel economy. *Light enough for an import, tough enough for a semi.*

PRODUCT NUMBER	PER CASE	U.S. MEASURE	U.S. WEIGHT	QTY. PER PALLET	LARGER SIZE

10131	4X1	1 Gallon	33 lbs	60 Cases	

ENGINE OIL STOP LEAK

Lucas Engine Oil Stop Leak is a unique formulation of Lucas additives and base stocks designed to stop leaks in engines. It is also an exceptional additive for worn and older engines, reducing engine noise and oil consumption while raising oil pressure. It contains no harmful solvents and can actually extend engine oil life by 50% or more.

PRODUCT NUMBER	PER CASE	U.S. MEASURE	U.S. WEIGHT	QTY. PER PALLET	LARGER SIZE

10279	4X1	1 Gallon	33 lbs	60 Cases	

LOW VISCOSITY STABILIZER

Lucas Low Viscosity Stabilizer is a new oil additive product specifically designed to amplify the life and performance of a modern engine that uses lower viscosity engine oils. The product improves fuel economy and power by reducing the level of friction which improves any premium quality motor oil. It is a multi-functional oil additive which reduces friction for more power and fuel economy, improves dispersancy to fight carbon deposits, sludge and varnish and contains antioxidants to help motor oil resist thermal breakdown. Above all, it reduces wear, extending the life of the engine.

PRODUCT NUMBER	PER CASE	U.S. MEASURE	U.S. WEIGHT	QTY. PER PALLET
11097	12X1	12 OZ	10.5 lbs	150 Cases

HIGH MILEAGE OIL STABILIZER

Lucas High Mileage Oil Stabilizer is a 100% petroleum product - developed in the laboratory and tested in the field for maximum reliability. It is a specially blended formulation of premium base oils and petroleum extractives for use in a wide range of engine and gear box applications. It is meant to be used as an additive to existing engine or transmission oils. It creates a coating that clings to metallic surfaces, eliminating dry starts that create the most damage and wear in an older engine. This product is for use in ALL engine-driven vehicles, and HIGHLY RECOMMENDED for recreational vehicles, farm equipment, industrial equipment as well as construction and military vehicles and equipment.

PRODUCT NUMBER	PER CASE	U.S. MEASURE	U.S. WEIGHT	QTY. PER PALLET
10118	12X1	1 Quart	25 lbs	70 Cases

ENGINE OIL STOP LEAK TOP OFF ADDITIVE

Lucas Engine Oil Stop Leak Top Off Additive is a long lasting product designed for high mileage engines. It conditions seals and o-rings to stop oil leaks and slow oil consumption. Contains state-of-the-art components to reduce friction and wear and extend engine life. Effective seal conditioning agents are used to condition hard and shrunken seals and gaskets. 1 quart treats up to 6 quart capacity. It mixes with all engine oils, conventional and synthetic and at any viscosity grade.

COMPLETE ENGINE TREATMENT

Lucas Complete Engine Treatment is a unique formulation that cleans and lubricates multiple systems in your vehicle. When added to fuel, it cleans and lubricates all components from the fuel tank to the cylinders. It removes deposits, protects against corrosion and helps the fuel to burn more completely, which helps to lower emissions, improves fuel mileage and increases power. When added to your oil, Lucas Complete Engine Treatment cleans your engine and forms a protective barrier against heat and friction, improves oil flow in cold weather and extends oil life. Contains no alcohol. **For All Engines and Oil Types.**

10016	12X1	1 Pint	14 lbs	126 Cases

FUEL TREATMENTS

Our pour-in solutions optimize a vehicle's performance and fuel efficiency.

With a powerful blend of additives, Lucas fuel treatments clean and lubricate a fuel system, improving fuel economy and reducing emissions.

IMPROVE FUEL ECONOMY • REDUCE EM

MISSIONS • CLEAN AND LUBRICATE FUEL SYSTEM

UPPER CYLINDER LUBRICANT FUEL TREATMENT

Lucas Upper Cylinder Lubricant Fuel Treatment is formulated for gasoline and diesel engines. It contains no harmful solvents or alcohol. This product is a blend of heat resistant, super slick oils and additives with a high detergent action that cleans as it lubricates the fuel system. It also causes the fuel to burn more efficiently for greater fuel economy and fewer emissions. It negates the harmful effects of “reformulated gasoline” especially in older automobiles and 2-cycle engines. Use in diesel engines to neutralize the harmful effects of ultra low sulfur diesel fuel. This product WILL raise MPG.

PRODUCT NUMBER	PER CASE	U.S. MEASURE	U.S. WEIGHT	QTY. PER PALLET	LARGER SIZES

10512	12X1	1 Pint	13 lbs	132 Cases	

DIESEL DEEP CLEAN®

Lucas Diesel Deep Clean® is a new Lucas technology developed to reduce the cost and hassle of particulate filter maintenance. It's an excellent preventative maintenance product. It causes the fuel to burn much cleaner, thus eliminating a lot of particulate matter that would otherwise go into the exhaust system causing “regens.” It cleans out much of the matter already trapped in the filter. This eliminates exhaust back pressure allowing the engine to run easier and cooler as well as lowering the aggravation and down time associated with particulate filters.

PRODUCT NUMBER	PER CASE	U.S. MEASURE	U.S. WEIGHT	QTY. PER PALLET

10873	6X1	2 Quarts	24 lbs	80 Cases

COMPLETE FUEL SYSTEM RENEWAL KIT

The Lucas Complete Fuel System Renewal Kit is your all-in-one system maintenance solution! Just follow the 4 easy steps to eliminate gum, varnish, particulate matter and corrosion from all lines and components. This kit restores maximum power and efficiency to your engine for a smooth, reliable ride. There's no more effective way to restore your vehicle's performance. For any gasoline vehicle.

PRODUCT NUMBER	PER CASE	U.S. MEASURE	QTY. PER PALLET
10966	6X1	10 lbs	175 Cases

HIGH MILEAGE FUEL TREATMENT

Lucas High Mileage Fuel Treatment is created specifically to restore lost power and performance in high-mileage vehicles. It cleans and lubricates fuel system components, removes valve deposits, lessens oil contamination and stops knocking and hesitation. It works great in modern port-injected engines, maintaining maximum flow and providing lubrication to critical parts.

Oxygen-sensor safe. Contains No Alcohol.

PRODUCT NUMBER	PER CASE	U.S. MEASURE	U.S. WEIGHT	QTY. PER PALLET
10977	24X1	5.25 OZ	10 lbs	224 Cases

OCTANE BOOSTER

Lucas Octane Booster is a GENUINE Performance Enhancer! Tested and proven to deliver three times more boost than most other brands. It's safe for turbos, oxygen sensors and catalytic converters. Stops knocks and raises MPG in high compression engines. Safe for any gasoline engine. Not recommended in 2-stroke engines. Available in a 2 oz. motorcycle size.

PRODUCT NUMBER	PER CASE	U.S. MEASURE	U.S. WEIGHT	QTY. PER PALLET
10725	18X1	2 OZ	3.6 lbs	252 Cases
10930	24x1	5.25 OZ	10 lbs	224 Cases
10026	12X1	15 OZ	12.5 lbs	132 Cases

CETANE POWER BOOSTER

Lucas Cetane Power Booster is a diesel fuel supplement that contains effective lubricants for the engine's high-pressure fuel injection pump. Expect cleaner exhaust, longer filter life, easier start ups and smoother idle, as well as, more power, more MPG and longer engine life. It adds much needed cleaners and lubricants to the diesel fuel and reduces wear by more than 27% in unadditized diesel fuel. It lubricates rings and cylinders for longer engine life and it maintains peak performance by reducing injector coking and internal injector deposits.

PRODUCT NUMBER	PER CASE	U.S. MEASURE	U.S. WEIGHT	QTY. PER PALLET

11032	6X1	2 Quarts	24 lbs	80 Cases

SAFEGUARD® ETHANOL FUEL CONDITIONER

Lucas Safeguard® Ethanol Fuel Conditioner was specially developed to prevent corrosion and degradation in ethanol based fuels caused by fuel separation. It protects your motor oil from the harmful side effects of alcohol combustion. It can be used in E-10, E-15, E-85, pure alcohol or any alcohol gasoline combination, even pure gasoline. For use in 2 and 4 stroke engines.

PRODUCT NUMBER	PER CASE	U.S. MEASURE	U.S. WEIGHT	QTY. PER PALLET

SYNTHETIC BRAKE FLUID DOT 3 & DOT 4

Lucas DOT 3 and DOT 4 Brake Fluids are compatible with all brake system rubber components and other brake fluids. They prevent seal hardening or softening. They also protect against rust and corrosion and provide excellent lubricity. These brake fluids are recommended for use in both disc and drum brake systems and clutch systems where this type of product is called out for.

TRANSMISSION FIX

Lucas Transmission Fix stops slipping in worn transmissions. It also cleans and lubricates sticking valves for proper shifting. This product will extend fluid life up to three times longer. It completely stops most seal leaks and controls heat and foaming. It's the perfect preventative maintenance product to stop initial wear in newer transmissions. A must for motor homes, towing vehicles, and all other hard working transmissions. Compatible with all transmissions and transmission fluids with the exception of CVT transmissions and transmission fluids. Will not void new car warranties. Contains no harmful solvents. Use also in light duty manual transmissions. (Results are usually immediate.)

PENETRATING OIL

Lucas Penetrating Oil is packaged in an aerosol can. This product can be used on nuts, bolts, bearings, hinges, sliding doors or a million other home and shop uses. The formula is petroleum based and designed to provide a microscopic film that rust proofs for up to a year inside or out. In addition to its non-silicone formula, it is fortified with anti-seize agents to be a truly superior penetrant to dissolve corrosion and rust without drying. The low odor formula has a locking pop-up tube and 360° application range, even upside down. The lubricating qualities are similar to a heavy oil but have the penetrating qualities of a solvent. The petroleum base provides excellent water protection even against salt water. A body shop safe product that is compliant in all 50 states.

TOOL BOX BUDDY

Lucas Tool Box Buddy is formulated with a unique Lucas additive chemistry that lubricates, penetrates, dissolves rust and provides indoor and outdoor rust protection against water, even salt water. It lubricates better, penetrates deeper and cuts rust faster than any other products. Excellent for locks, air tools, or anything exposed to moisture. Fits easily in any tool box. Excellent for household use. Does not contain harmful solvents.

AIR TOOL LUBRICANT

Lucas Heavy Duty Air Tool Lubricant is a long lasting, super slick product that allows air tools to run easier and last longer. It's a complex blend of pure petroleum oils and additives specially formulated to combat rust and varnish for the working professional. It coats the working parts with a cushion of water-proof lubricants that resist "blow-out," enabling it to lube the tool, not the floor.

PRODUCT NUMBER	PER CASE	U.S. MEASURE	U.S. WEIGHT	QTY. PER PALLET

CHAIN LUBRICANT

Lucas Chain Lubricant has excellent high temperature stability and clinging qualities. It contains organic Moly plus a complex blend of special additives and select base oils. It is a long lasting, all-weather, all-temperature lubricant and protectant for chains, sprockets, cables and open gears. It has a stronger lubricant film than grease and is impervious to salt water.

CHAIN LUBE AEROSOL

Lucas Chain Lube is formulated with unique Lucas additive chemistry that penetrates deeply into the pins and bushings of the chains and provides excellent rust and corrosion protection as well as outstanding water resistance. Our product does not sling off and resists rust. It has been tested by professional motorcycle riders and can be used on all chain types. It sprays in any direction, even upside down, and has a unique foam property.

MULTI-PURPOSE PARTS CLEANER & DEGREASER

Lucas Multi-Purpose Parts Cleaner and Degreaser is formulated with advanced Polyetheramine (PEA) detergents to clean and degrease carburetors, chokes, brake calipers, rotors, air intakes, throttle bodies and all unpainted metal parts. PEA is a highly effective cleaning agent that helps remove unwanted deposits such as gum, varnish, oil, brake fluid, grease, dirt and sludge. It is a fast drying, multi-purpose product suitable for all automotive cleaning and degreasing. It removes any build-up that can cause loss of power, rough idle, high emissions and hard starting, and cleans brakes for better performance and smoother operation. One product for all your degreasing and solvent cleaning jobs. Does not contain CFC's or chlorinated solvents. 50 States VOC compliance.

GEAR OIL & TRANSMISSION

Lucas gear oil offers exceptional protection against wear, heat, and corrosion, ensuring prolonged gear life, formulated with the highest quality additives and available in several different weights. Trusted in industrial, heavy duty, and high-performance markets for superior shifting and durability.

Transmission products, are specially formulated blends that eliminate chatter, prevent slipping, leaks, wear, rough shifting and greatly extend transmission life in a diverse range of applications. Lucas transmission products are ideal for worn transmissions, agricultural equipment, passenger cars, lawn mowers, heavy duty trucks and other vehicles, providing a reliable solution for smoother and more reliable gear shifts.

PROTECTION • SUPERIOR SHIFTING • PREVENTION

HEAVY DUTY GEAR OILS

Lucas Heavy Duty Gear Oils are blended with an extra additive package, over and above the normal gear oil additives. With these products, you can expect longer oil life, lower oil temperatures, longer component life, fewer seal leaks and LESS NOISE. This is what gear oil was meant to be. **COOLS & QUIETS**

INDUSTRIAL GEAR OILS

Lucas Industrial Gear Oils are blended with the highest quality base oils and additives to provide extreme pressure protection, resistance to foam and excellent rust, corrosion and oxidation protection. Non-corrosive to brass, bronze, steel and other copper alloys. These oils can be used in chain drives, sprockets, plain and anti-friction bearings, slide guides and flexible couplings. They can be used in manual transmissions, gear cases and worm gears on mobile contractor type equipment. They provide excellent shock loading properties and are designed to withstand heavy loads. Meets AGMA (American Gear Manufacturers Association) gear specifications. Recommended for use in bevel, spur, herringbone, planetary, worm and industrial hypoid gears.

“SURE-SHIFT” SEMI-SYNTHETIC AUTOMATIC TRANSMISSION FLUID

Lucas “Sure-Shift” Semi-Synthetic Automatic Transmission Fluid has been developed to give smooth precise shifts and it extends a degree of protection not found in any other ATF. It will stop wear and tear like nothing you’ve ever tried, and it’s very long lasting. It’s compatible with most transmissions and transmission fluids and it’s excellent for Allison Transmissions. Not recommended for use in CVT and Ford Type F transmissions.

SYNTHETIC MULTI-VEHICLE CVT FLUID

Lucas Synthetic Multi-Vehicle CVT Fluid is a premium, full synthetic transmission fluid specifically designed for use in passenger cars with steel belt-driven or chain continuously variable transmissions. It guards against wear and corrosion. It resists shear thinning better than typical CVT fluids. Provides superior cooling and excellent low-temperature fluidity for smoother operation in cold weather. Protects against sludge and varnish formation. Excellent oxidation resistance and thermal stability. It has a low coefficient of friction between steel and clutch material to eliminate shudder. It has been specifically engineered to have the unique frictional properties required for use in this type transmission.

HYDROSTATIC TRANSMISSION FLUID SYNTHETIC BLEND SAE 20W-50

Especially formulated to withstand the unique demands of hydrostatic transmissions in zero-turn, stand-on or ride-on mowers. Hydrostatic drive is what makes this possible; the ability to apply variable torque to the left or right wheel. These systems require a versatile and robust hydraulic system and thus, an equally robust hydrostatic drive fluid. Lucas Oil has just the product for these mowers. This SAE 20W-50 multi-grade viscosity oil provides excellent protection against all lubricated parts, has added detergency, dispersancy and rust protection over motor oils, that are sometimes used in this application, and will not shear thin over time. Additionally, Lucas Synthetic Blend Hydrostatic Drive Fluid contains a seal conditioner to discourage leaks, so the fluid stays in the mower, not on the grass. Together, these attributes result in a long-life fluid that truly holds up over time and extends equipment life. Recommended for all hydrostatic drive systems where the manufacturer recommends SAE 20W-50 fluid. Not recommended for engine crankcase.

PURE SYNTHETIC 50 WT. TRANSMISSION OIL

Lucas Pure Synthetic 50 WT. Transmission Oil is especially designed for heavy duty truck transmissions but can be used in many other applications. It contains an exclusive additive concentrate derived from synthetic oil that ensures lower operating temperatures and better lubrication, especially to upper bearings and gears. This is a long lasting fluid that is far superior to conventional synthetic 50 WT's.

ANTI-SQUAWK / ANTI-SHUDDER ADDITIVE

Lucas Anti-Squawk/Anti-Shudder Additive was developed to specifically address squawk noise in gear and transmissions of agricultural equipment at initial startup. It eliminates the noise and is suitable for use in temperatures well below freezing. It has been proven to be effective in reducing shudder in automotive transmissions including Hondas. As a Limited Slip Additive: For rear axles equipped with limited-slip differentials that chatter, or scrub around hard turns, add 4-8 oz to the differential for smooth, quiet turning.

HEAVY DUTY MINING & CONSTRUCTION GREASE

Lucas Heavy Duty Mining and Construction Grease is a smooth, dark gray, lithium complex grease fortified with 5% molybdenum disulfide to provide excellent shock loading protection in the most adverse operating conditions. Protects wrist pins and booms from wear. It extends equipment life, reduces down time and improves productivity. It can be used with grease guns as well as in centralized dispensing systems found in industrial plants and heavy duty equipment. Recommended in Caterpillar 994 series loaders and 5130 and 5230 series shovels, off-road trucks, construction equipment, agricultural equipment, logging equipment, mining equipment (heavy duty top loaders), rock crushers, oil field equipment, off shore drilling equipment and marine equipment. Also recommended in 5th wheels, chassis and steering linkages. Meets or exceeds OEM specifications.

MARINE GREASE

Lucas Marine Grease is a premium grease of the over-based calcium sulfonate type with inherently superior corrosion resistance, resistance to water washout, mechanical stability and extreme pressure lubrication. Due to these properties, it is ideally suited for marine applications where these important properties are intrinsic to the grease and not the result of fortification with additives. Additionally, it has excellent load-carrying capacity and resistance to oxidation. It contains no heavy metals (e.g. lead, arsenic or antimony) or other environmentally harmful additives such as phosphorus, chlorine or zinc. Lucas Marine Grease meets NLGI Certification GC-LB. Not recommended for centralized dispensing systems requiring NLGI consistency number of 1 or less.

SAE 15W-40 MAGNUM HIGH TBN CI-4

Lucas SAE 15W-40 Magnum CI-4 oil was designed to last up to twice as long as plain 15W-40 oils. It's a blend of high quality base oils and an additive package that allows extended drain intervals and a much higher degree of protection from metal to metal contact. It holds much more soot in suspension than conventional 15W-40 oils. Expect less oil consumption and higher oil pressure. It guarantees a cool, quiet performance, a higher degree of lubricity, longer engine life and no dry starts. It is also the perfect lubricant for hard working hydrostat transmissions.

SYNTHETIC BLEND SAE 10W-30 FA-4 MAX FE (FUEL EFFICIENCY) HEAVY DUTY MOTOR OIL

Lucas Synthetic Blend SAE 10W-30 API FA-4 Max FE (Fuel Efficiency) Heavy Duty Motor Oil is specifically designed for newer model year diesel engines which are designed for maximum fuel efficiency, employing engine oils with lower High Temperature High Shear Viscosity than standard CK-4 HD motor oils. It provides protection and oxidation resistance for highly rated diesel engines running in severe service conditions. It also provides enhanced protection against engine wear, piston deposits, particulate filter blocking, oil oxidation, catalyst poisoning, and viscosity increase related to soot. It's not backward compatible with CK-4 or CJ-4 standards.

HYDRAULICS

These highly effective additives and fluids provide excellent wear protection in hydraulic systems. Designed to meet or exceed the most stringent OEM standards, Lucas hydraulic fluids ensure smooth machine operation, reduce friction and extend the lifespan of critical hydraulic parts, increasing fluid life, stopping leaks and increasing hydraulic pressure.

REDUCE FRICTION • EXTEND PARTS

LIFESPAN • INCREASE HYDRAULIC PRESSURE

HYDRAULIC OIL BOOSTER & STOP LEAK

Lucas Hydraulic Oil Booster & Stop Leak is an inexpensive solution to your hydraulic problems. It's the perfect preventative maintenance product for new equipment and the best solution for worn hydraulics and transmissions in older equipment. A 5-10% addition will condition seals to stop leaks and restore load pressure in old equipment, or prevent leaks and wear in new equipment. It renews worn fluids, removes varnish from wet brakes and clutches; stopping slippage and lowering operating temperatures. It's impregnated with anti-foam agents. This product does not contain harmful solvents. More may be added in badly worn equipment.

ANTI-WEAR HYDRAULIC OILS

Lucas Anti-Wear Hydraulic Oils are manufactured with the highest quality paraffinic base oils and special Lucas additives to provide maximum hydraulic service performance. They provide excellent wear protection in critical hydraulic pump parts and eliminate rust and corrosion problems as well as minimize foam, and have excellent demulsibility properties. Designed for use in hydraulic systems operating over 1,000 psi and for use in machine tools, presses, die casting, airline lubricators, reciprocating air compressors, circulating systems, hydraulic control systems and plain and anti-friction bearings. Can be used in all pump designs including vane, gear, axial and radial pumps. Lucas hydraulic fluids are filtered before packaging to an ISO Cleanliness rating of 16/14/11 and will outlast standard hydraulic oil by double, up to 12,000 hours of service.

MULTI-VISCOSITY ANTI-WEAR ISO 32 HYDRAULIC OIL

Lucas Multi-Viscosity AW Hydraulic Oil ISO 32 is a premium product blended with highest quality synthetic base oil stocks and Lucas special additives to provide anti-wear protection and maximum performance. The extremely high viscosity index and low pour point permit this fluid to be used in wide operating temperatures. Recommended for use in mobile construction equipment, vane, gear, and piston type hydraulic pumps. Suitable for use in all industrial hydraulic systems operating up to 3000 psi. Can also be used in plain and anti-friction bearings, airline lubricators and reciprocating air compressors.

R&O HYDRAULIC OILS

Lucas R&O Industrial Oils are manufactured with the highest quality paraffinic base oils and special Lucas additives to provide excellent rust, corrosion and oxidation protection. Excellent demulsibility allows product to separate from water quickly. They contain effective foam inhibitors to stop foaming. They're designed for use in air compressors and hydraulic systems operating under 1,000 psi that do not require anti-wear additives. They also have applications in plain and anti-friction bearings, vacuum pumps, electric motors as well as centrifugal, turbine and deep well pumps. They truly function as a general purpose lubricant.

HEAVY DUTY TRANS & DRIVE TRAIN OILS

Lucas Heavy Duty Transmission & Drive Train Oils are formulated to meet Caterpillar TO-4 specification as well as Allison C-4 and Komatsu Micro-Clutch specifications. Designed for use in Caterpillar power shift transmissions, clutches, brakes, final drives, bevel gears and differentials. Formulated with unique Lucas Oil additive systems to provide the highest performance for extended oil life. They minimize foam, provide excellent copper corrosion and rust protection and have excellent low temperature properties, shear and oxidative stability.

SYNTHETIC NON-CONDUCTIVE ANTI-WEAR HYDRAULIC OILS

Lucas Synthetic Non-Conductive Anti-Wear Hydraulic Oil is formulated with pure base oils and an additive chemistry that provides excellent oxidative and thermal stability. It provides excellent wear protection and reduces deposits and sludge. It contains an effective foam inhibitor which minimizes foam. Dielectric strength of 38 kV makes it an excellent non-conductive fluid. The minimum value required is 35 kV. Dielectric strength is extremely sensitive to humidity and contamination. Once the containers are opened, the dielectric strength cannot be expected to remain at its original value. Containers should be kept tightly sealed and stored in a dry environment.

Our product is recommended for use wherever non-conductive fluids are required. Typical uses include cherry pickers and firetruck snorkels. High flash point reduces danger of fire.

SYNTHETIC COMPRESSOR OILS

Lucas Synthetic Compressor Oils are high quality, 100% synthetic lubricants based on PAO/diester technology. They offer extended service life in rotary screw compressors and reduce deposits in single and multi-stage reciprocating air compressors. Lucas Synthetic Compressor Oils provide excellent oxidative and thermal stability. They provide excellent wear protection and reduce deposits and sludge. Lucas unique formula reduces foam and minimizes air entrainment.

MOTOR OIL

The ultimate performance and protection for all engine types – this advanced, comprehensive line of the highest-quality motor oils provides superior lubrication, reduces friction and wear, while maximizing engine performance and fuel efficiency. Fortified with a precise blend of additives that provide better thermal stability, oxidation resistance, and viscosity control, ensuring optimal lubrication even under extreme operating conditions.

SUPERIOR LUBRICATION • REDUCES FRICTION

AND WEAR • MAXIMIZING FUEL EFFICIENCY

SYNTHETIC API SP MOTOR OILS

In upgrading our line of synthetic API licensed motor oils to the API SP and ILSAC GF-6 standards, Lucas Oil established a premium line of engine oils that provide maximum protection and performance from oil change to oil change. Lucas Synthetic API SP Passenger Car Motor Oils (PCMO) are blended from the highest quality API Group III and Group IV base oils and combined with a cutting-edge additive package of detergents, dispersants, antioxidants, and corrosion inhibitors. Shear stable viscosity modifiers insure multi-grade performance throughout the life of the oil. With the advent of API SP/ILSAC GF-6, enhanced performance and improvements can be seen specifically in: low speed pre-ignition (LSPI) protection, maintaining piston cleanliness, oxidation control, engine oil sludge prevention, timing chain wear protection, improved fuel economy, turbocharger protection in turbocharged gasoline direct injection (TGDI) engines, as well as proven performance in Hybrid applications. Lucas Synthetic SAE 0W-16 API SP Motor Oil is our low-viscosity, fuel saving formula with viscosity modifiers that is well suited to late model cars. It's a low-drag lubricant that outlasts conventional motor oil. **Available with GM Dexos¹® Gen 3 specification.*

HIGH MILEAGE SYNTHETIC BLEND API SP MOTOR OILS

Lucas High Mileage Synthetic Blend API SP Motor Oils are formulated to the API SP and ILSAC GF-6 standards* to create a premium line of engine oils that provide maximum protection and performance from oil change to oil change. They're blended from the highest quality API Group II and Group III (synthetic) base oils and combined with a cutting-edge additive package of detergents, dispersants, antioxidants, and corrosion inhibitors, in addition to seal conditioners suitable for high mileage cars and trucks. Shear stable viscosity modifiers insure multi-grade performance throughout the life of the oil. With the advent of API SP/ILSAC GF-6, enhanced performance and improvements can be seen specifically in: maintaining piston cleanliness, oxidation control, engine oil sludge prevention, timing chain wear protection and fuel economy benefits. Our High Mileage Synthetic Blend API SP Motor Oils are a more economical option to synthetic motor oils, but still provide the benefits of a high quality, API certified SP engine oil and with added seal protection. For even more performance and longer drain intervals, consider Lucas Synthetic API SP Motor Oils.

CONVENTIONAL API SP MOTOR OILS

Lucas Conventional API SP Motor Oils are blended from the highest quality API Group II base oils and combined with a cutting-edge additive package of detergents, dispersants, antioxidants, and corrosion inhibitors. In upgrading our line of API licensed motor oils to the API SP and ILSAC GF-6 standards, Lucas Oil established a premium line of engine oils that provide maximum protection and performance throughout the oil change interval. Shear stable viscosity modifiers insure multi-grade performance throughout the life of the oil. With the advent of API SP/ILSAC GF-6, enhanced performance and improvements can be seen specifically in: maintaining piston cleanliness, oxidation control, engine oil sludge prevention, timing chain wear protection and fuel economy benefits. Our Conventional API SP Passenger Car Motor Oils (PCMO) are an economical alternative to synthetic motor oils, but still provide the benefits of a high quality, API certified SP engine oil. For even more performance and longer drain intervals, consider Lucas Synthetic API SP Motor Oils.

HOT ROD & CLASSIC OILS

Lucas Hot Rod & Classic Car Motor Oils are manufactured with the highest quality paraffinic base oils and fortified with a unique additive package containing high levels of zinc, molybdenum and phosphorus, which provides a tougher, thicker additive film for maximum protection even under the most severe conditions. They improve the film strength between the cylinder wall and piston rings. They have good cold temperature properties and stand up to high operating temperatures. Compatible with methanol and all racing fuels, as well as with synthetic and non-synthetic oils. Recommended for muscle, showroom, classic and trophy cars without catalytic converters. Can be used in racing applications. Not recommended for passenger car use.

HIGH PERFORMANCE EUROPEAN SYNTHETIC MOTOR OILS

Lucas High Performance European Synthetic Motor Oils are proven to withstand the toughest conditions on the road or the track. A blend of high quality synthetic oils and a proprietary additive package provides maximum protection against extreme heat and friction, including cold weather dry starts. These oils allow engines to run cooler and stronger and increase the interval between oil changes. Perfect for gasoline, diesel and turbo-charged engines.

MOTORCYCLE

When it's time to ride, Lucas keeps you moving. Our dedicated motorcycle product line offers riders a range of premium oils, fuel additives, and lubricants for any two-wheeled adventure. With Lucas products in the tank, expect better engine performance, extended lifespan, improved fuel efficiency and effortless maintenance, allowing you the peace of mind to disconnect and just ride.

EFFORTLESS MAINTENANCE • BETTER ENGINE

PERFORMANCE • IMPROVED FUEL EFFICIENCY

HIGH PERFORMANCE MOTORCYCLE OILS

Lucas Motorcycle Oils are built for endurance. These oils will lower oil temperatures, extend the life of vital components, reduce noise and leaks and increase performance. SAE 20W-50 is also an excellent gear oil and primary oil. All Lucas High Performance Motorcycle Oils meet or exceed API SM/SL/SJ, JASO MA-2 and ACEA A3 specifications.

SxS/UTV 4-STROKE ENGINE OILS

Lucas Synthetic and Synthetic Blend SxS/UTV 4-Stroke Engine Oils are a high-performance, all-temperature and all-weather-ready engine oils that are recommended by Lucas Oil for use in side-by-side (SxS), ATVs, UTVs and virtually all off-road recreational vehicles. They're blended with high-quality synthetic base stocks, premium additives and shear-stable viscosity modifiers to provide unmatched performance. Formulated and proven to provide premium lubrication, resist oxidation, exhibit improved cold-weather fluidity and stay-in-grade viscosity, no matter how much the oil is sheared. Premium dispersants and detergents keep engines clean and free of deposits. Suitable for use in all popular SxS makes and models.

SxS/UTV COMMAND DRIVE FRONT DIFFERENTIAL FLUID

Lucas SxS/UTV Command Drive Fluid is blended from premium synthetic base oils only (API Groups III & V), combined with shear stable synthetic polymers, a high-quality additive package that includes anti-wear, anti-oxidants, friction modifiers and corrosion inhibitors to produce a truly superior fluid for the front differential of Polaris vehicles, including ACE, Sportsman, Ranger and RZR and may be used safely as a substitute for Polaris Demand Drive Fluid. Contains a friction modifier for smooth and rapid engagement of the front differential. This fluid will not permanently shear thin, ensuring that viscosity remains constant over the life of the fluid. It provides superior anti-wear protection and reduces the effects of shock loading. It will hold-up under heat and stress.

SxS TRANSMISSION FLUID

Lucas SxS/UTV Transmission Fluid is blended from premium synthetic base oils only (API Groups III & V), combined with shear stable synthetic polymers and a high-quality additive package that includes anti-wear, anti-oxidants and corrosion inhibitors, producing a truly superior SxS transmission fluid. It was designed specifically to meet the requirements of Polaris vehicles' transmission/gearcase and may be used safely as a substitute for AGL. This fluid will not permanently shear thin, ensuring that viscosity remains constant over the life of the fluid. It provides superior chain and gear wear protection, reduces the effects of shock loading and will hold-up under heat and stress.

SxS/UTV MULTI-PURPOSE GEARCASE AND DIFFERENTIAL FLUID

Lucas SxS/UTV Multi-Purpose Gearcase and Differential Fluid is blended from premium synthetic base oils only (API Groups III, IV & V), combined with shear stable synthetic polymers, a high-quality additive package that include anti-wear, anti-oxidants and corrosion inhibitors to produce a truly superior multi-purpose SxS lubricant, suitable for the transmission/gearcase, front and rear differentials of most SxS, UTV and ATV available today. This fluid contains a friction modifier for smooth engagement of the front differential and low wear. It will not permanently shear thin, ensuring that viscosity remains constant over the life of the fluid. It provides superior chain and gear wear protection. It reduces the effects of shock loading and will hold-up under heat and stress. Our CleanGear formula fights lacquer, deposits and corrosion. Suitable for applications requiring gear and wet brake fluid.

PRIMARY CHAINCASE OIL

Lucas Primary Chaincase Oil is a blend of easy flowing base oils and a Lucas additive package designed to carry away more heat from the clutch and friction plates. This assures a longer, more trouble-free clutch life. Expect a smooth clutch action, less slippage, longer chain and sprocket life and much longer oil life. 100% petroleum designed for heavy duty and high performance situations. It can also be used as a Sportster transmission fluid.

SYNTHETIC SAE 50 WT. V-TWIN OIL

Lucas Synthetic SAE 50 WT. V-Twin Oil is blended specifically for 4-stroke, air-cooled V-Twin/Opposed-Twin/Slant-Twin engines made after 1984. Lucas Oil's race bred technology makes this oil help your engine run cooler, smoother, longer. Excellent for V-Twin power plants from Harley Davidson, BMW, Ducati, Motoguzzi and many others. Contains special Lucas additive chemistry to provide the highest performance possible. Designed for engine applications only.

SYNTHETIC SAE 75W-140 V-TWIN GEAR OIL

Lucas Synthetic SAE 75W-140 V-Twin Gear Oil is blended with the highest quality synthetic base oils and a Lucas synthetic additive package making it superior to any other motorcycle gear oil. Expect a cool, quiet performance with minimum drag and wear. Stands up to high horse power and high temperature. Designed especially for V-Twins but excellent for use in any heavy duty or high performance transmission. Safe for all metals including bronze and brass.

MOTORCYCLE OIL STABILIZER

Lucas Motorcycle Oil Stabilizer is a 100% petroleum product developed specifically for motorcycle applications. Its 12 ounce size makes it perfect for fitting into saddle bags or other on board storage areas. It virtually eliminates dry starts and wear. It extends oil life and lowers oil temperatures, especially in Harley Davidson's. It's designed to improve oil pressure, reduce smoking, eliminate oil leaks and blow-by in older engines. It also quiets engines and can be used in gear boxes and primaries.

HIGH PERFORMANCE FOAM FILTER OIL

Lucas Foam Filter Oil is a unique low solvent, low viscosity formula designed to penetrate the filter media and trap dust, dirt and sand while improving air flow. Because it has a slight tackiness it stays in place throughout the service life. Its waterproof formula helps block out moisture and water. Will not clog foam filters even in colder temperature applications. Its blue color ensures coverage across the entire filter area.

2-CYCLE OIL

The perfect companion for small engines – Lucas 2-Cycle Oils ensure optimal performance in motorcycles, ATVs, karts, watercraft, outboard motors, lawn equipment, and additional two-stroke engines providing superior lubrication, reducing smoke, and extending the life of equipment overall. Add Lucas for a smooth, reliable operation every time.

SMOOTH • OPTIMAL PERFORMANCE • EXTENDS LIFE

SEMI-SYNTHETIC TC-W3® 2-CYCLE LAND & SEA™ OIL

Lucas Semi-Synthetic TC-W3® 2-Cycle Land & Sea™ Oil was specifically formulated to address the performance requirements of water-cooled outboards and personal watercraft. It is fortified with a unique Lucas additive chemistry and an ashless detergent inhibitor package to minimize spark plug fouling, pre-ignition, and ring sticking. It also has applications in motorcycles requiring API TC oils, chain saws, snowmobiles, golf carts and lawn mowers. Mix ratio is 50:1 and is recommended for use in pre-mix or direct injection systems. NMMA® Certified. Not recommended for use in air-cooled 2-cycle applications requiring JASO FC, FD oils.

MARINE

Get ready for the water with Lucas's wide range of high-performance marine oils, additives and appearance products. Engineered to optimize engine performance and protection in marine environments, our meticulously crafted oil and fuel additives are designed to keep your vessel running smoothly.

OPTIMIZE PERFORMANCE •

PROTECT • RUN SMOOTHLY

MARINE ENGINE OILS

Lucas Marine Engine Oils are produced with the highest quality base oils and an exclusive Lucas high performance additive package that assures maximum protection under the most extreme operating conditions. They are compatible with both synthetic and non-synthetic oils and can be used with methanol and other racing fuels. These oils are long lasting and designed to cling to metal parts during long-term storage to protect from harmful dry starts.

OUTBOARD AND INBOARD MARINE ENGINE OILS

Lucas Outboard and Inboard Marine Engine Oils are formulated especially for the harsh conditions of high-speed watercraft. These oils are catalyst compatible but work well in any 4-stroke application, inboard, outboard or personal watercraft. They are long lasting and fortified with a special blend of synthetic additives that coat all moving parts to guard against rust and moisture during long periods of storage. Meets industry standard API SM (automotive) as well as JASO MA standards for air-cooled motorcycles and all-terrain vehicles. NMMA® certified to meet or exceed FC-W (CAT) performance. **CATALYST COMPATIBLE**

MARINE FUEL TREATMENT

Lucas Marine Fuel Treatment is designed specifically to address the issues watercraft owners experience with their engines and fuel systems. Lucas Marine Fuel Treatment fights corrosion, keeps fuel lines, carburetors or fuel injectors clean and free of deposits while lubricating and protecting vital engine parts. Powerful detergents, including polyether amines, improve cleanliness in the fuel system and internal engine parts. It's designed for gasoline and diesel engines, 4-stroke or 2-stroke. Upper cylinder lubricants insure smooth operation and longer engine life.

MARINE GREASE

Lucas Marine Grease is a premium grease of the over-based calcium sulfonate type with inherently superior corrosion resistance, resistance to water washout, mechanical stability and extreme pressure lubrication. Due to these properties, it is ideally suited for marine applications where these important properties are intrinsic to the grease and not the result of fortification with additives. Additionally, it has excellent load-carrying capacity and resistance to oxidation. It contains no heavy metals (e.g. lead, arsenic or antimony) or other environmentally harmful additives such as phosphorus, chlorine or zinc. Lucas Marine Grease meets NLGI Certification GC-LB. Not recommended for centralized dispensing systems requiring NLGI consistency number of 1 or less.

SLICK MIST® MARINE SPEED WAX

Lucas Oil Slick Mist® is a polymer paint gloss intensifier, which can be used on other surfaces such as glass, chrome and vinyl decals. Use Slick Mist® as a traditional wax, quick detail spray or spray it on your boat between rinsing and drying for the easiest polish job ever. Just spray it on a wet or dry surface and wipe it off. Slick Mist® out performs the competition and will leave your finish slicker and shinier than any product on the market, with long lasting protection. Great at removing hard water deposits and is ideal in saltwater and freshwater applications.

PRODUCT NUMBER	PER CASE	U.S. MEASURE	U.S. WEIGHT	QTY. PER PALLET
10980	12X1	24 OZ	22 lbs	90 Cases

ATTENTION: Do not use any Slick Mist® products on floors, vehicle controls (pedals, grips, steering wheels), motorcycle seats or tire treads, bicycle seats or tire treads, brake drums and any other surfaces where slipperiness may be hazardous. **SHAKE WELL BEFORE USING.**

OUTDOOR

Whether you're in the backcountry tailing an 8-pointer or gearing up the ATV or boat for the weekend, be ready with Lucas's adventure-forward oils and additives. Find high-performance, all-weather-ready engine oils, firearm cleaners and more to keep your outdoor equipment in safe and reliable working order.

• HIGH-PERFORMANCE

HUNTING GUN OIL The Original

Lucas Gun Oil is a special blend of oil and petroleum extracted additives. It's super slick, yet clings to metal parts for easier operations and zero wear. It resists "burn off" many times longer than conventional oils and will not dry off during long periods of storage. Odorless all-purpose firearm lubrication, ideal for hunting firearms, bows and general household use. Packaged in an attractive counter top display.

PRODUCT NUMBER	PER CASE	U.S. MEASURE	U.S. WEIGHT	QTY. PER PALLET	LARGER SIZE
10006	18X1	2 OZ	3.6 lbs	252 Cases	55 GAL DRUM 10560

EXTREME DUTY GUN OIL

Lucas Extreme Duty Gun Oil is designed for firearms that experience high volume, full auto and suppressed fire. It provides unmatched, burnoff-resistant protection unlike any other multi-purpose gun oil. Polymeric film protects metal parts from rust, wear and moisture during extreme conditions. It neutralizes acids caused by contact from human hands and resists drying during long periods of storage. Provides maximum heat resistance. For use on bolt carrier groups and all other moving parts.

EXTREME DUTY CLP

Lucas Extreme Duty CLP Cleans, lubricates and protects firearms in one simple step, in a liquid or aerosol formula. Cleans: Dissolves powder, residue and contaminants and effectively cuts rust on neglected firearms. Lubricates: Contains effective anti-wear additives to reduce friction and wear, which extends the life of the firearm and its runtime. Protects: Fast drying formula is designed to protect against rust and corrosion during long storage periods, minimizes fingerprints and effectively repels water.

CONVENTIONAL RACING ENGINE OILS

The “PLUS” is for the extra additives above and beyond those found in ordinary racing oils. These true high performance lubricants were developed especially for top fuel and top alcohol engines. These products contain special Lucas additives that resist fuel dilution like no other oil possibly can. Just like our other high performance oils, these racing oils contain Moly and friction modifiers. More importantly, the PLUS formula resists squeezing out of the bearings under heavy load.

SEMI-SYNTHETIC RACING ENGINE OILS

Lucas Semi-Synthetic Racing Engine Oils blend the best of both worlds to create an excellent combination of protection and power with an eye toward the budget. This blend guarantees lower oil temperatures through a high-tech blend of new ZINC technology that should be required use on all high performance flat tappet cam engines. Semi-synthetic is also compatible with all fuels, including E85 and methanol and with its higher lubricity offers outstanding benefits like quicker acceleration rates. In addition to increased thermal stability, semi-synthetics also offer reduced cavitation which improves oil pump performance.

SYNTHETIC SAE 5W-20 JR. DRAGSTER RACING ENGINE OIL

Lucas Synthetic 5W-20 Jr. Dragster Oil was developed for high RPM naturally aspirated gasoline and alcohol engines in Jr. Dragsters, Go Karts, and Quarter Midgets. It is also excellent for use in Outlaw 330 alcohol engines. Contains a high level of ZINC and phosphorus to protect cylinder walls, cams and lifters in splash only oil systems.

SYNTHETIC FL-0 LOW VISCOSITY RACING ENGINE OIL

Lucas FL-0 is a premium, super-efficient, low viscosity racing engine oil. Ideal for Pro Stock Racing or any application using low-viscosity engine oils. Lucas FL-0 is formulated with an exclusive blend of PAO, organic esters, dispersants, borated organic compounds, friction modifiers and ZDDP. Lucas FL-0 is specially formulated to reduce drag yet protect vital engine components. It has a very high viscosity index to provide even performance from startup to the finish line. Lucas FL-0 was born-and-bred from our in-depth experience with racing and leverages advances we have made in sponsored teams using specialty formulations over many years.

ASSEMBLY LUBE

Lucas Assembly Lube is designed for mechanics and technicians to pre lube bearings, cams, lifters and valve train. It's perfect for engine building. The semi-synthetic formula contains zinc, Moly and other high pressure additives which offer maximum protection during engine break-in. Super slick and easy to use, it will eliminate dry starts and prevent seizing galling and scuffing.

RACING ASSEMBLY GREASE

Lucas Engine Assembly Grease is a heavy duty and corrosion resistant grease made of Calcium Sulfonate Complex thickener. It is suitable for all metals. It provides anti-wear, extreme pressure properties and dissolves completely in oil. Provides protection during initial start-up and is designed for use on cams and lifters. It is also recommended for use on distributor caps, rocker shafts, rocker tips, push rod tips, wrist pins and valve guides. Tested and approved by top NASCAR teams.

L9, L10 & L11 RACING GEAR OILS

Lucas Gear Oils provide excellent thermal stability and longevity throughout the entire drive train system. Recommended for use in both transmissions and differentials. These formulas were specifically developed with special anti-wear agents and lubricity agents to control wear and drag as well as special additives to control heat. This feature is not found in ordinary gear oils. They're excellent for race cars and any heavy-duty application where plain gear oils just aren't good enough. The L-Series gear oils feature lightweight viscosities specially blended for road racing and closed-course use in three different blends depending upon your requirements. They use the latest additive package technology that offers improved heat transfer characteristics, improving gear and bearing life even in the most severe applications.

SYNTHETIC SAE 140 & 250 RACING GEAR OILS

Lucas Synthetic SAE 140 and 250 Gear Oils are designed for high horsepower, high torque conditions. Made from the highest quality heavy synthetic base oils, Lucas Racing Gear Oils contain a proprietary package of additives and extreme pressure lubricants specially engineered for shear stability and the demands of severe racing conditions. This synthetic formulation provides a barrier cushion between metal surfaces. It absorbs impact by creating a barrier coating on gear surfaces for the critical line of protection against wear, pitting and scoring. These oils are long lasting and perfect for any heavy duty application.

SEMI-SYNTHETIC TYPE F AUTOMATIC TRANSMISSION FLUID

Lucas Semi-Synthetic Type F ATF is blended from premium paraffinic and synthetic base oils (Groups II+ and III), with shear stable synthetic polymers and viscosity modifiers, combined with a high-quality additive package that includes anti-wear, anti-oxidants and corrosion inhibitors. It is not friction modified so the shift character is "sport" or "hard shift," ideal for racing or wherever a fast, positive shift is required. It resists shear thinning and will hold-up under heat and stress, just the properties that racers require from their ATF. For non-racing applications, these benefits are realized as long-life for the fluid and the transmission equipment, since it resists oxidation, reducing lacquer and deposits. For use in Drag Racing, Stock, Super Stock, Super Gas, Super Comp, Comp, classic cars requiring a Type F Automatic Transmission Fluid.

ENGINE BREAK-IN OILS

Lucas Racing Break-In Oils help seal new rings while providing excellent extreme pressure properties that protect the entire valve train and of course, the camshaft. Especially designed for flat tappet camshafts, but can be used wherever you need the extra wear protection in the form of zinc. Zinc levels typically at 3600 PPM, which is much higher than commercial passenger car oils. Recommended for use in racing applications only. Not recommended for passenger cars requiring API service oil.

SLICK MIST® CERAMIC SPEED WAX

Slick Mist® Ceramic Speed Wax is a professional SiO2 Hybrid ceramic paint sealant and durable protectant anyone can use. It's UV resistant, easy to use and provides super glossy appearance, beading and protection with long lasting, instant results. May be used on gel coat, glass and chromed surfaces. Also works great on aluminum surfaces, vinyl wraps, Paint Protection Films (PPF,) matte finishes and ceramic coated surfaces. Overspray will not harm rubber and plastic trim. We recommend use every one to two months. 100% compatible with Lucas Slick Mist® Speed Wax.

ATTENTION: Do not use any Slick Mist® products on floors, vehicle controls (pedals, grips, steering wheels), motorcycle seats or tire treads, bicycle seats or tire treads, brake drums and any other surfaces where slipperiness may be hazardous. **SHAKE WELL BEFORE USING.**

BAG IN A BOX

Lucas Oil's "Bag in a Box" oil program is specifically designed to be used by dealerships, auto repair shops, and quick lubes for their ability to carry multiple oil grades and specialty items for faster lube servicing and dispensing. The packaging is 100% recyclable with an eco-friendly design that reduces waste by using less plastic and utilizing every drop from the oil. Lucas Oil's most common motor oils are available in "Bag in a Box".
